

Your recent PHP 8 & WordPress upgrade caused layout issues, inconsistent typography, and broken structure across homepage, Dog page, and more. Left unfixed, users may bounce, and conversions drop.

Customers leave when they face:

- Misaligned layouts that hurt usability
- Fonts & styles that break brand identity
- Pages that no longer look like the original design

What I'll Do:

- Restore the original design using custom CSS, child themes & backups
- Fix typography and layout across all pages
- Ensure stability on PHP 8 with theme customization

Why Me?

- Full-Stack Developer with strong WordPress knowledge
- Restored sites after upgrades & fixed broken themes
- Skilled in PHP 8, custom CSS, and design restoration
